

- The pendant system „Premium I“ enables a comfortable and cost-effective possibility to supply the operating room via the ceiling.
- The „Premium I“ series offers upscale equipment for the operating room at an excellent price-performance ratio.
- The pendant system is in height adjustable, has 1 swivel boom, a motor arm with 1000 mm each and a swivel range of 320° each. The installed components are available in DIN and British standard (further country-specific equipment on request).
